

## CS WIND Offshore is the new name of Bladt Industries

*CS WIND Offshore's new corporate identity is to underline its expertise with offshore wind and connection with South Korean owner CS WIND Corporation.*

In December 2023, global leading wind turbine tower manufacturer CS WIND completed the acquisition of Bladt Industries, now renamed CS WIND Offshore, to underline the expertise in delivering foundations, and substations for offshore wind farms.

- With the new name, we want to emphasize that we are fully committed to offshore wind. We are proud of the history of Bladt Industries as a company that has shaped the offshore wind industry and earned the trust from many customers since the early years. We will continue to cherish the legacy and utilize the many years of expertise, says Joseph Oh, CEO in CS WIND Offshore and adds:

- We have become part of a global, strong corporation, and although our end products vary - the complex task of shaping massive steel structures is the same for all CS WIND entities - hence, we collaborate globally and have a solid foundation of experience, know how, relationships and network to support us. With the acquisition completed, CS WIND Offshore has emerged strengthened and we want our company name and identity to reflect this: We are not alone – we are part of the global CS WIND family.

Now follows a period of implementation of the new company name and alignment to new ways of working, as the integration of CS WIND Offshore in the CS WIND corporation continues.

### **CS WIND Offshore**

In December 2023 South Korea-based CS WIND completed the acquisition of Bladt Industries, now renamed CS WIND Offshore to underline the expertise in delivering transition pieces, monopiles, jackets, floating foundations, and substations for offshore wind farms. With the industry's most extensive track record and more than 20 years of experience, our more than 1,000 employees in Denmark carry on the legacy of being the foundation for the green transition - now supported by the global CS WIND family.
